0435 549 660 | chinying.kong12@gmail.com | Melbourne, VIC | [LinkedIn](#) | [GitHub](#) | [Personal Website](#)

PROFILE

A highly motivated, meticulous, and determined professional with 10+ years of customer-facing experience across the retail and insurance industries. Adaptable to change with a proven ability to adjust to new cultures, workplaces, and industries. Skilled in building full-stack websites and applications by consistently applying learning. Ready and committed to adding tangible value to your organisation.

SKILLS

- HTML
- CSS/Bootstrap/Tailwind
- JavaScript
- Vitest
- Node.js
- Express with Node.js
- PostgreSQL
- MongoDB
- React
- Python with Flask
- APIs
- GitHub

RELEVANT EXPERIENCE

Instructor Associate (Part Time) | General Assembly | Feb 2023 – Aug 2023

- Assisted lead instructor by preparing daily coding challenges and engaged in solution walk-throughs with students.
- Reviewed pull requests on homework and project submissions and provided constructive feedback to students.
- Provided debugging assistance to students during project sprints.

Software Engineering Student | General Assembly | Sep 2022 – Nov 2022

- Completed a 12-week bootcamp which covered full stack engineering, databases, APIs and GitHub, while deploying multiple projects including group projects.
- Demonstrated my collegiality and ability to learn new concepts quickly, I provided guidance and assistance to other classmates by having a study group.

Projects

Tic Tac Toe

- Completed using vanilla HTML, CSS and Javascript, this logical project was a great start and I focused on the front end being attractive and user friendly.

Music Festival Collection App

- Full-stack project with Express, this app allows you to store all your favorite music festivals, also allows you to add your favorite music festival into a wishlist.
- Through this project I learned how the backend links to the frontend that includes RESTful API, CRUD and MongoDB that it uses to store data.

Adora Kong (Chin Ying Kong)

SOFTWARE ENGINEER

Kerosene Dating App

- Group project with full-stack technologies that combines React and Express.
- This app allows users to swipe profiles based on their preferences (gender and age). Once they are matched, both users are allowed to chat to each other.
- Through this project I learned how to do a single-page application by using React and combining it with Express as the backend technology.
- This is my first group project; I had a taste of team collaboration and learnt the value of committing often and communicating often.
- Login Credential:
 - Username: rubberdork; Password: 123456

Chat-Up

- Group project using React and Firebase to build a chatting app allows users to send messages and images.
- Through this project I learned Firebase within 2 to 3 days to build the chat-app and also used Tailwind for styling.
